

Juan Alberto Cosio

Biopharmaceutical Chemist

Contact:

I'm a recent university graduate with a huge passion for Clinical Research and Drug Discovery, counting with initiative skills, time management, teamwork, and considered as a "catalyst" because I like to speed up the work but at the same time do each part of the process correctly, one of my main qualities is that I always think of innovative solutions to constant problems and because of that I've achieved to improve the effectiveness in my job area, considered a huge fan of learning new stuff and having a professional competing English level.

Training

Biopharmaceutical Chemist

La Salle University

2017-2021

Introduction to the Principles & Practice of
Clinical Research (2021-2022)

NIH

2022

Good Clinical Practice

The National Institute of Drug Abuse NIDA

2021-2024

Medicinal Chemistry & Drug Discovery

Davidson College

2022

Scientific communication in health
sciences

PAHO

2021

Experience

Clinical Pharmacist | Mar - Jul 2021

National Institute of Cardiology

I realized the pharmacotherapeutic follow-up to the cardioneumology patients floor, helping the health area to achieve a major security in the patient's medication through the attention of detail, teamwork, and constant training. I also assisted: multiple physicians & nursery staff, 2 respiratory therapists, 4 clinical nutritionists and 7 clinical pharmacists with the patient healthcare. Coming with a great work attitude and thanks to that I achieved to spread encouragement to my work team.

Laboratory assistant | Mar 2020 - Oct 2021

La Salle University-School of Chemical Sciences

I made an academic research project about inflammation and potential compounds found in a group of plants called *Poaceae spp*, helping 6 students with their doubts, and thanks to that I accomplished to improve their performance because they were motivated, and the work environment automatically improved. I needed to adapt and learn how to use multiple softwares, web tools. And also I practiced my English in researching, redacting and reading scientific articles.
